

# BREATHE EASY RINK

CONTINUOUS MONITORING FOR AIR QUALITY

## ICE ARENA INDOOR AIR QUALITY MONITORING SYSTEM

### *When Safety Matters...*

Ice arena owners and managers all over the world are aware of public concerns regarding Carbon Monoxide (CO) and Nitrogen Dioxide (NO<sub>2</sub>) levels in ice rinks. Breathe Easy Rink continuous monitoring systems allow facility personnel to automatically and continuously measure and archive readings to assist in overall building management.

The Breathe Easy Rink system allows for preset notification alert levels and frequency based on individual facility requirements.

These notifications can be sent to multiple facility contacts via email or text to assure that the alerts are addressed in a timely manner.

### *Better Data, Less Hassle, Improved Arena Performance!*

#### FEATURES & BENEFITS:

- Eliminates the cost & hassle of Drager tubes & delivers true hourly averages - 24/7/365.
- Delivers accurate CO & NO<sub>2</sub> readings continuously & confirms safe building performance in real-time.
- Automatically measures & archives readings. Data is available if needed in the future.
- Check your air quality reports, real-time and historical, from any computer by logging into your web based account.
- Customize your own alert levels & frequency.
- Graph data makes it easy to see variations in ventilation or equipment performance so corrective actions can be taken.

THE BREATHE EASY RINK MONITOR IS NOW WIRELESS MAKING IT EASIER TO INSTALL PLUS WE HAVE ADDED THE ABILITY TO MONITOR BOTH CO AND NO<sub>2</sub>.
