

Ice Rink Dehumidification Solutions!

Only Becker Arena Products offers the ARID-ICE MS-2600 as the *best* way to dehumidify your indoor ice arena for Hockey, Figure Skating, Speed Skating and Curling!

Indoor ice arenas require humidity control to stop several problems, including fog, mold growth and dripping. Because the ice sheet cools the building, moisture-laden air from the outdoors condenses on anything below the "Dewpoint."

ARID-ICE MS-2600 eliminates these symptoms. Your skaters will appreciate improved ice conditions, and spectators are more comfortable. In addition, your refrigeration equipment will run more efficiently, *and* less frequent resurfacing is required. Efficient operation and favorable customer response make for a more profitable skating facility.

Becker Arena Products is the **exclusive** distributor of the ARID-ICE MS-2600 in the United States. For more information, please call 800-234-5522 or visit www.beckerarena.com

This system provides the driest, most comfortable, efficient & economical solution for arena humidity!

ARID-Ice

Becker Arena Products, Inc.
6611 West Highway 13
Savage, MN 55378

Arid-Ice MS 2600 is the perfect solution when replacing your old mechanical dehumidifier that no longer works.

BENEFITS:

- Operates year-round - System provides December humidity even in July
- Eliminates fog condensation
- No drips on building structure and ice
- Mold and mildew can't survive at low humidity levels
- Reduce energy costs by removing latent load
- Dependable operation - No compressor, refrigerant or coils to freeze
- Better Ice - No condensation = hard ice, no mushrooms and less resurfacing
- Better Air Quality for skaters and spectators
- 61" (L) x 40" (W) x 36½" (H)
- 350 lbs
