

How Thick? Find Out Quick! And Accurately!

Measure and Record Ice Depth Quickly and Accurately with the advanced technology of IceTec 8 Precision Ice Measurement Tool from PrecIce Technology Inc.

This precision measurement tool eliminates the inefficient and inaccurate process of drilling, measuring and recording while kneeling on the ice! With the revolutionary IceTec 8 you can accurately measure and record the depth of an entire rink in less time than it takes to drill and measure a few holes. The IceTec 8 uses state-of-the-art ultrasonic technology to measure ice depth accurately on both concrete and sand based rinks.

Turn it on. Touch the ice surface. Ice thickness is displayed digitally and recorded with the touch of a button.

The on-screen Rink Diagram shows you where you have measured and where you need to measure. Use the IceTec 8 to keep your rink level, safe and rink-ready in record time – maintaining proper and consistent ice thickness lowers energy costs and improves set-up times. **Thick is now quick.**

ICE TEC 8

Only from Becker Arena Products

Experience the Becker Difference! • 6611 West Highway 13 • Savage, MN 55378 • 800-234-5522 • www.beckerarena.com

"How Thick?" is That Quick!

ICETEC 8 IS EASY TO USE

1. Upload a Pattern to the Tool
2. Measure the Rink
3. Download the Data
4. Add Directions for the Ice Technician
5. Print Report
6. Record Corrective Action and Save

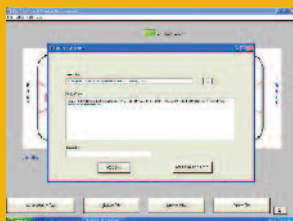

FEATURES

- LCD Display with Rink Diagram
- Up to 60 Programmable Rink "Points"
- Measures in Inches or Millimeters
- Reports: Time and Date Stamped
- Use previous Data for Comparison Reports
- Install exact thickness, saves time + water

PACKAGE INFORMATION INCLUDES:

- Hand held LCD Measurement Tool
- Multiple Platform Software (web upgrades)
- Quick Start Manual and PDF Manual with complete instructions
- 800 Support
